PIC 900 : No SMOKING OF ELECTRONIC CIGARETTES

With the appearance of electronic cigarettes, it has been necessary to clarify the places where they are prohibited or authorised, to avoid any confusion. For information, the texts of interior laws and regulations generally prohibit smoking, without defining the nature of this smoking. This ban therefore applies to tobacco cigarettes and to electronic cigarettes.

CHEMICAL ABSORBENT FAMILY:

All of these pads and rolls start with a highly absorbent polypropylene core - the difference is what happens from there. Features such as durability, absorbency grades and coverstock give you versatile absorbent options for your specific application.

	Applications	Durability	Linting	Absorbency Grades	Construction
High Visibility Safety & Chemical Mat Page 28	Applications with higher risk of slips, trips and falls. Foot traffic areas.	✓✓✓	Low Linting	Medium Weight	 3-PLY Spunbound - Meltblown - Meltblown coverstock, dimpled and perforated
Universal® Plus Pads, Rolls & Booms Page 29	For industrial applications where greater durability is needed with hazardous chemicals	✓✓	Medium Linting	Medium Weight	 2-PLY Meltblown + spunbound on 1 side, dimpled and (optional) perforated
Hazwik Socs & Pillows Page 30	To prevent spills from spreading, to absorb spills & leaks liquids in tight spaces				

Increase Safety and Save: Colour Coded Waste Stream

Save on disposal costs by using different coloured absorbents in specific parts of your facility and throughout your waste streams.

For example: a facility might use yellow absorbents in radioactive areas and green absorbents in their chlorine areas. Then the facility would use grey universal absorbents for the rest of their facility. A colour coded system benefits your employees' understanding of the waste stream because they will assume yellow absorbents are saturated with radioactive waste and green absorbents are saturated with chlorine.

HIGH VISIBILITY SAFETY & CHEMICAL MAT

- Sign and absorbent all in one.
- High visibility, safety mat for all purpose fluid pick-up and hazardous chemical.
- Colour-coded yellow for safety and easy separation of hazardous waste
- 3-ply construction (Spunbound, Meltblown and Meltblown coverstock)
- Product will not react with aggressive fluids

UN PADS & ROLLS -

FOR USE WHEN CHEMICALS AND HAZARDOUS LIQUIDS ARE INVOLVED!

- Absorb a wide range of chemicals, including acids and caustics.
- One-sided spunbond gives extra strength as well as lower lint.
- Chemically inert: product does not degrade or cause a dangerous chemical reaction with the adsorbed liquid.
- Green colour alerts workers that product is being used for hazardous liquids.
- Green colour also allows the user to identify and separate hazardous waste for disposal, resulting in lower disposal costs.
- Perforated for flexibility – tear at the perforations for smaller sized pads to use only what you need.

Perfect to clean up chemical spills...

... or for use in laboratories.
