## Product Information Sheet B-747 Lab <br> Effective Date: 1/28/19 <br> B-747 LASER PRINTABLE WHITE POLYESTER LABEL STOCK

This Product Information Sheet is focused on the suitability of B-747 for laboratory applications. For additional data regarding B-747 performance please refer to B-747 Technical Data Sheet.

Description:
GENERAL
Print Technology: Laser
Material Type: White polyester
Finish: Matte white
Adhesive: Permanent acrylic

## APPLICATIONS

Laboratory identification such as plates, bottles and general laboratory identification.

*Topcoat is destroyed by pressure cooker process.
**Print/topcoat is slightly damaged by exposure to boiling water.

- Label may work in application; test results were mixed
$\mathbf{X}$ Label not recommended for application; label came off either during testing or after test surface was removed from environment.

PERFORMANCE PROPERTIES
CHEMICAL RESISTANCE
Printed samples of B-747 were laminated to glass microscope slides and allowed to dwell 24 hours prior to testing. Test conducted at room temperature. Samples were immersed in the test solvent for 15 minutes. The samples were removed from the test solvent and rubbed 10 times with a cotton swab saturated with the test fluid. The rating scale below shows the effect to the quality of the print for each sample.

| CHEMICAL REAGENT | SUBJECTIVE OBSERVATION OF VISUAL CHANGE |  |  |
| :---: | :---: | :---: | :---: |
|  | EFFECTS TO LABELSTOCK | EFFECTS TO PRINTED IMAGE |  |

WHEN PERFORMANGE MATTERS MOST"
Rating Scale:
1=no visible effect
2=slight smear or print removal, detectable but minimal smear
3=moderate smear or print removal (print still legible)
4=severe smear or print removal (print illegible or just barely legible)
$5=$ complete print and/or topcoat removal
NP=print removed prior to rub

## Shelf Life:

Shelf life is two years from the date of receipt for this product as long as this product is stored in its original packaging in an environment below $80^{\circ} \mathrm{F}\left(27^{\circ} \mathrm{C}\right)$ and $60 \% \mathrm{RH}$. It remains the responsibility of the user to assess the risk of using this product. We encourage customers to develop testing protocols that will qualify a product's fitness for use in their actual application.

## WARRANTY

Brady products are sold with the understanding that the buyers will test them in actual use and determine for themselves their adaptability to their intended uses. Brady warrants to the buyers that its products are free from defects in material and workmanship, but limits its obligation under this warranty to replacement of the product shown to Brady's satisfaction to have been defective at the time Brady sold it. This warranty does not extend to any persons obtaining the product from the buyers. This warranty is in lieu of any other warranty, express or implied, including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose, and of any other obligations or liability on Brady's part. Under no circumstances will Brady be liable for any loss, damage, expense, or consequential damages of any kind arising in connection with the use, or inability to use, Brady's products.

[^0]:    PERFORMANCE PROPERTIES $\quad$ LAB SIMULATED ENVIRONMENT
    Performance properties were tested on printed B-747 samples. Samples were laminated to glass vials ( 2.8 cm outer diameter), polypropylene centrifuge tubes ( 3.5 cm outer diameter, 50 ml capacity), flat polypropylene and glass microscope slides and allowed to dwell 24 hours before exposure to the indicated environments.
